- No Public Access

Detailed Map Description

Terminal Map Description

Overview: McKinney National Airport has a single-level terminal with four gates. North is at the top of the map. The gates and passenger concourse run east to west along the north side of the building. The three passenger entrances are on the south side and the parking lot is directly south of the terminal.

Entering the Terminal: There are three entrances along the south side of the building, all reached from the parking lot directly to the south. The west entrance opens near baggage claim. The center entrance opens into the ticketing and check-in hall. The east entrance opens near the rental car counters and the east administrative offices.

Ticketing and Check-In: The ticketing and check-in counters are in the center of the terminal, just inside the center and east entrances, with passenger queuing lanes in front of the counters.

Security and Post-Security Areas: The security screening checkpoint is in the center of the terminal. The entrance to the security screening checkpoint is directly north of the center terminal entrance and west of the ticketing and check-in area. Passengers travel north through the checkpoint to reach the gate concourse. Post-security amenities include terminal seating, concessions, restrooms, family restrooms, a nursing room, and a pet relief area.

Restrooms and Family Amenities: Restrooms are located in two areas. The first is before security, in the center-west of the terminal near the administrative offices, and includes a family restroom. The second is past security, in the corridor immediately south of the concourse between Gates 2 and 3; this area includes two family restrooms, a nursing room, and a pet relief area.

Gate Locations: All four gates are along a single concourse that runs east to west across the north side of the terminal. Gates are numbered from west to east: Gate 1 at the west end, Gate 2 and Gate 3 in the west and center sections, and Gate 4 toward the east end. Terminal seating runs the length of the concourse, with larger seating areas between Gates 1 and 2 and east of Gate 4.

Water Refill Stations: Water refill stations are located in two areas. The first is before security, at the south end of the center-west restroom area. The second is past security, in the corridor between the main restrooms and the family restrooms, south of Gate 2.

Concessions and Vending: Concessions are located in the center of the concourse, between Gate 3 and Gate 4. Vending machines are located just past gate 4 or across from future gates on the east side of the passenger gate area.

Baggage Claim: Baggage claim is located at the far west end of the terminal, near the west entrance. Arriving passengers travel west along the concourse, then south, to reach the claim area.

Rental Car Counters: Rental car counters are located in the southeast corner of the terminal, near the east entrance. An exit to the rental car lot is at the south end of the east wall.

Administrative Offices: Administrative offices are located in two places. The first administrative office is located in the center-west of the terminal, east of the pre-security restrooms. The second administrative office is located at the east end between the ticketing area and the rental car counters.

Parking: The parking lot is located directly south of the terminal, in front of the main entrances, and is accessible from all three entrances.
